

NuFDA 3XX Fire damper

Inclined and reversed dry-range valve inverted. The NuFDA-3xx series of fire dampers are particularly performance in terms of operability and manoeuvrability, while guaranteeing high standard levels of fireproof

Key benefits

- Low-maintenance (no intumescent seal)
- Operated at a distance
- Proven reliable and resistant

Performance

- Up to EI 120 S ve i <->o under 1500 Pa according to NF EN 1366-2
- Ageing process (up to 500 cycles)
- Seismic resistance
- Cumulative qualification (EDF CRT 62.C.009 index 2)

Options

- Compatible with NuDUCT in a duct mounted fire protection, in remote configuration

Technical data

- 300 x 300 mm to 1000 x 1000 mm (*)
- Electric, pneumatic or manual drive
- Inclined and reversed dry span (without intumescent seal).

Application

- Installations possibles :
 - wall mounted
 - Offset in duct.
