

NuFDA 4XX Fire damper

Fire damper using intumescent seals to provide fire protection.

Key benefits

- Operated at a distance
- Reliability and robustness of the actuator
- Removability of the valve without disassembly the valve

Performance

- EI 120 S ve i <->o under 1500 Pa according to NF EN 1366-2
- Ageing process (up to 300 cycles)
- Seismic resistance

Technical data

- 200 x 200 mm à 800 x 800 mm
- Electric or manual drive
- 3 different motorisation ranges

Application

- Possible installations
 - recessed
 - wall mounted

Références
