

NuPLUG_I04

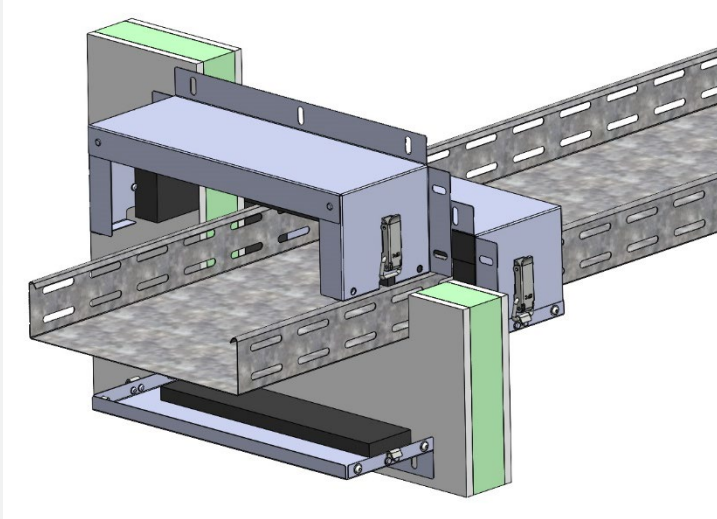

(anciennement EvoluPART)

Fireproof and watertight cable box

The NuPLUG_I04 a fire-resistant cable box for the caulking of electrical cables.

- ❖ Wall-mounted installation really quick and easy
- ❖ Can be installed in rooms with specific air-tightness requirements
 - rooms in under pressure / overpressure
 - rooms using gas extinction system
 - rooms with controlled leakage rate
- ❖ Installed in new build, industries and building maintenance or renovation
- ❖ Allow the evolution of electrical installations
 - new crossings without fire sectorisation damages
 - no drilling or dust during maintenance work

The box can be easily installed over existing cables: it is made up of two parts that fit around existing cables/cable trays.

Tested on flexible partitions and concrete, for all types of European, network and telecommunications cables (cat. L, M & S) in accordance with standard EN 1366-3.
