

BagPART Intumescent fire blankets

BagPART is an intumescent fireproof bag designed to seal cable passages in slabs, walls and drywall.

Key benefits

- Adaptable to hopper size
- Quick and easy installation
- Compressible between 10 and 50%, fits into tight configurations
- Reusable
- An opening at the end of the bag allows them to be attached if necessary

Performance

- Fire resistance EI120
- Reaction to fire M0

Technical data

- Dimensions : 25 x 15 x 5cm
- weight: 0,38Kg

Implementation

- Quick installation, no special tools required
- Its elasticity allows for easy installation and retention by simple compression

System option

- In case of slab fixings, position a grid to facilitate the positioning to prevent them from falling during installation (or removal)

Accreditations and qualifications

- PV CERIB n°032861
- Tested according to European standard EN 1366-3 for the temporary sealing of electrical cable ducts
