

NuSCREEN 5111 Heat screen

NuSCREEN 5111 is a heat screen (which can be movable) used for the protection of equipment by thermal radiation attenuation. These equipment also allows the protection of an evacuation in case of fire.

Key benefits

- Flexible protection
- Adaptable to the environment

Performances

- W120
- Thermal radiation attenuation W120 (covered by E120 qualification)
- Watertightness and water sprinkler
- Weight: 19kg/m²

Specifications

- European standard 1364-1

Application

- implemented on a custom-made structure, the shield is quick and easy to install
- Option: possibility to install the heat screen on a steel frame with wheels
