

NuSCREEN 6501 Removable heat screen

NuSCREEN 6501 is a mobile flame arrester used to provide protection for radioactive drums located in a storage area, against external aggressions (fire from an electric trolley or other equipment).
These screens also allow protection for the works in case of an event of a fire.

Key benefits

- Removable.
- Quick to install.

Performance

- Flame retardant up to 4 heures.

Technical data

- Thermal conductivity at 20° : 0,55W/mK.
- Dimensions according to the protection required.
- Finish : galvanised steel, stainless steel or lquered steel.

Application

- Set up on a custom-made structure, the screen is easily and quickly installed
- Installed on a steel frame with wheels
